

DF+ Verification Tool

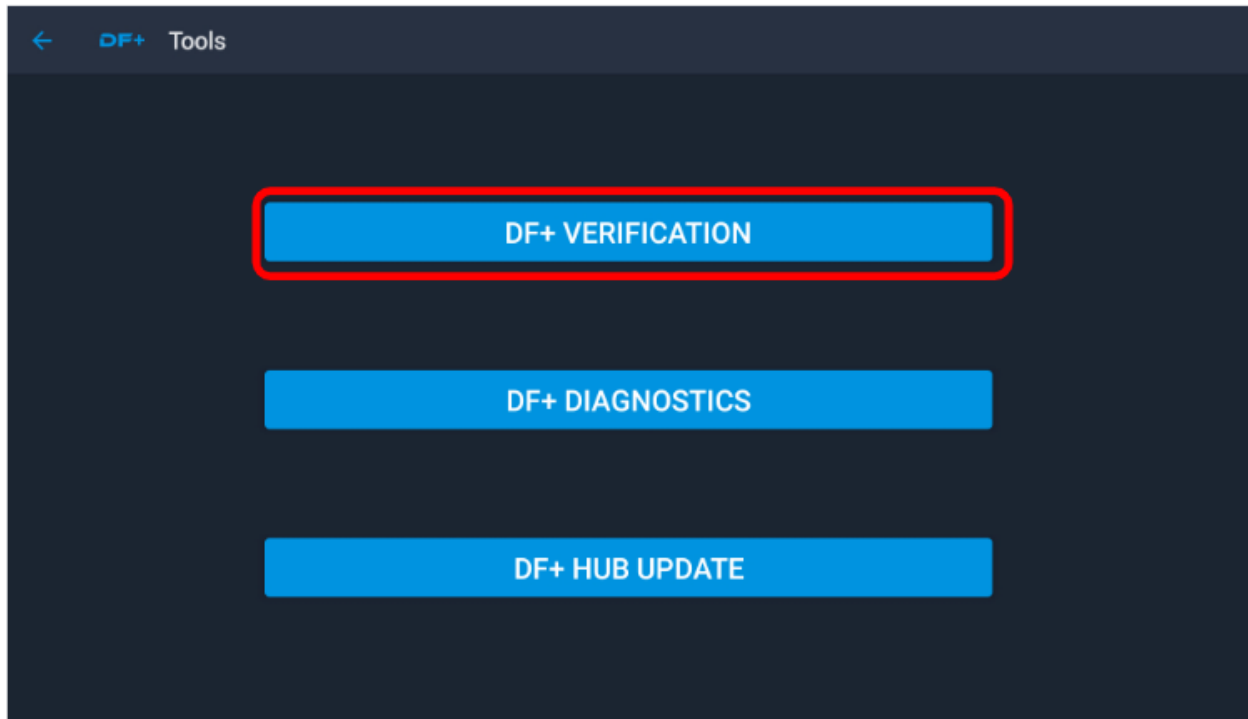

****DigiTrack 8.10.1 or newer required****

****Hub Software 1.1.44 or newer required****

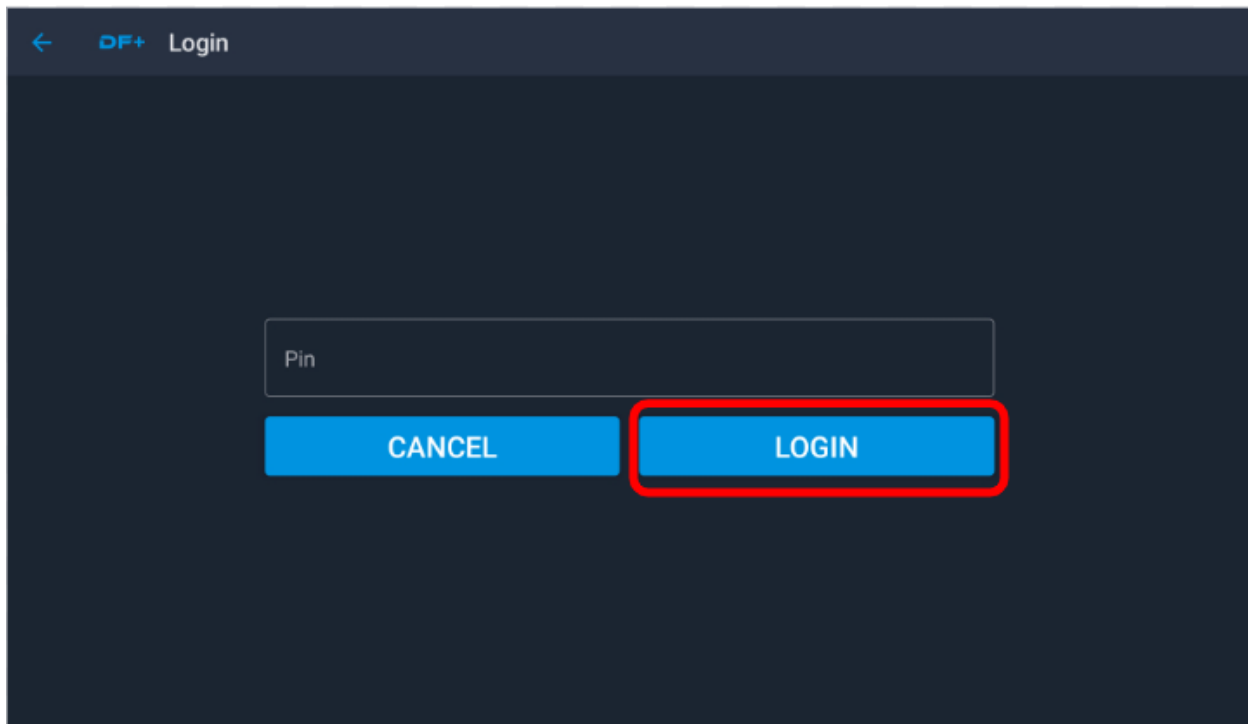

Open the DF+ menu screen by pressing the DF+ icon in the upper right corner.

Open the update tool by pressing the DF+ VERIFICATION button.

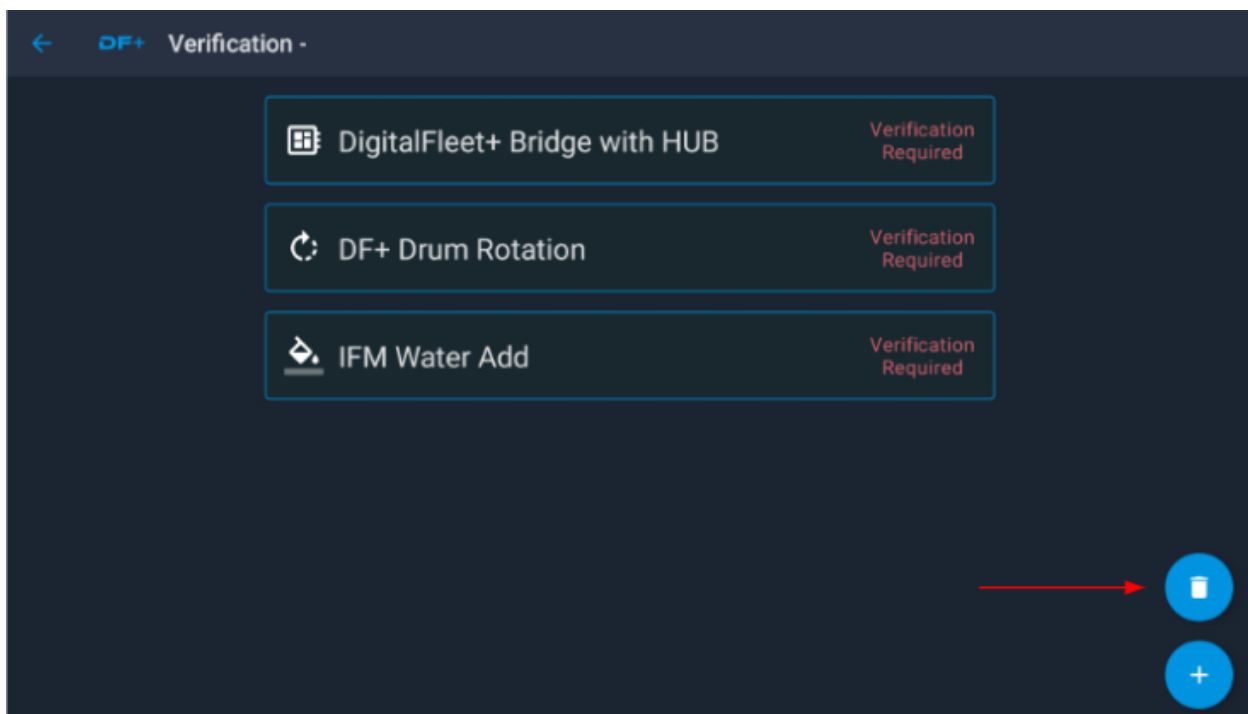

Enter in your login pin and touch the LOGIN button to continue.

The image shows a mobile application screen titled "DF+ Login". At the top left is a back arrow icon. Below the title is a text input field labeled "Pin". Below the input field are two blue buttons: "CANCEL" and "LOGIN". The "LOGIN" button is highlighted with a red rectangular border.

Depending on the configuration of the truck, the next screen will show the DF+ Devices to be verified. If you do not have this option on your truck, you may delete one of the sensors.

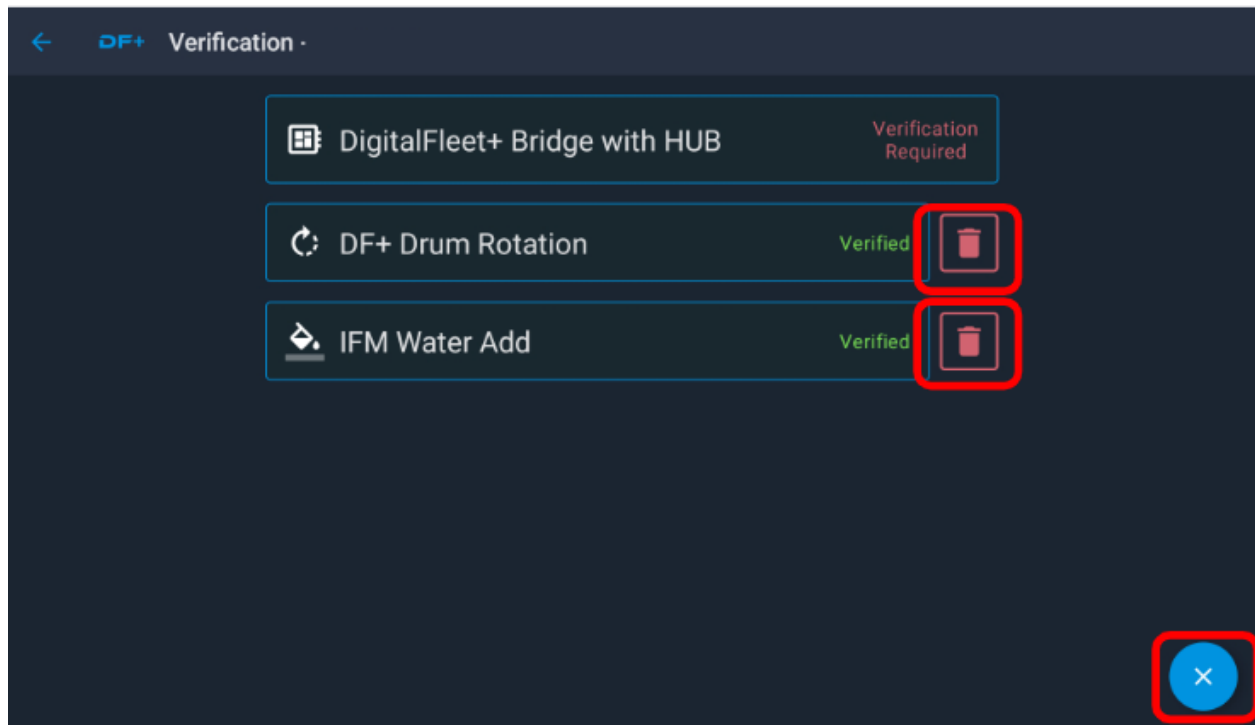

The image shows a mobile application screen titled "DF+ Verification". At the top left is a back arrow icon. Below the title are three device cards, each with an icon, a name, and a "Verification Required" status:

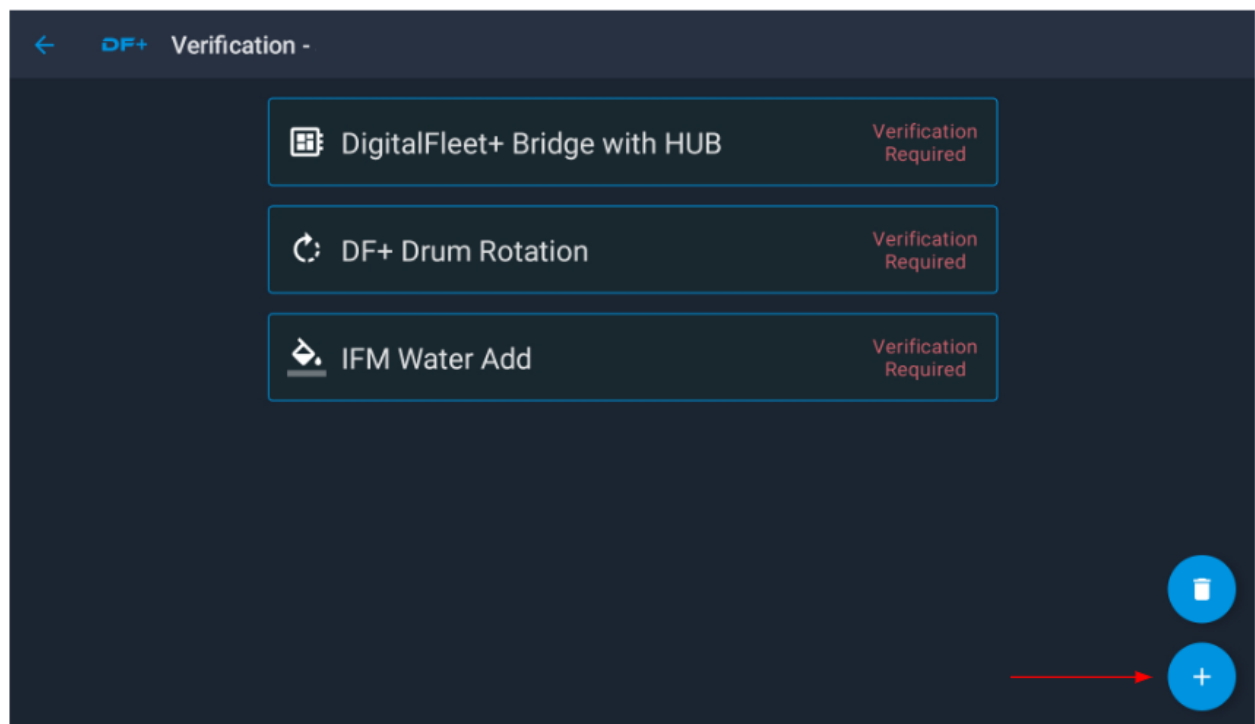

-  DigitalFleet+ Bridge with HUB Verification Required
-  DF+ Drum Rotation Verification Required
-  IFM Water Add Verification Required

At the bottom right, there are two circular buttons: a blue button with a white trash can icon and a blue button with a white plus sign. A red arrow points from the right towards the trash can button.

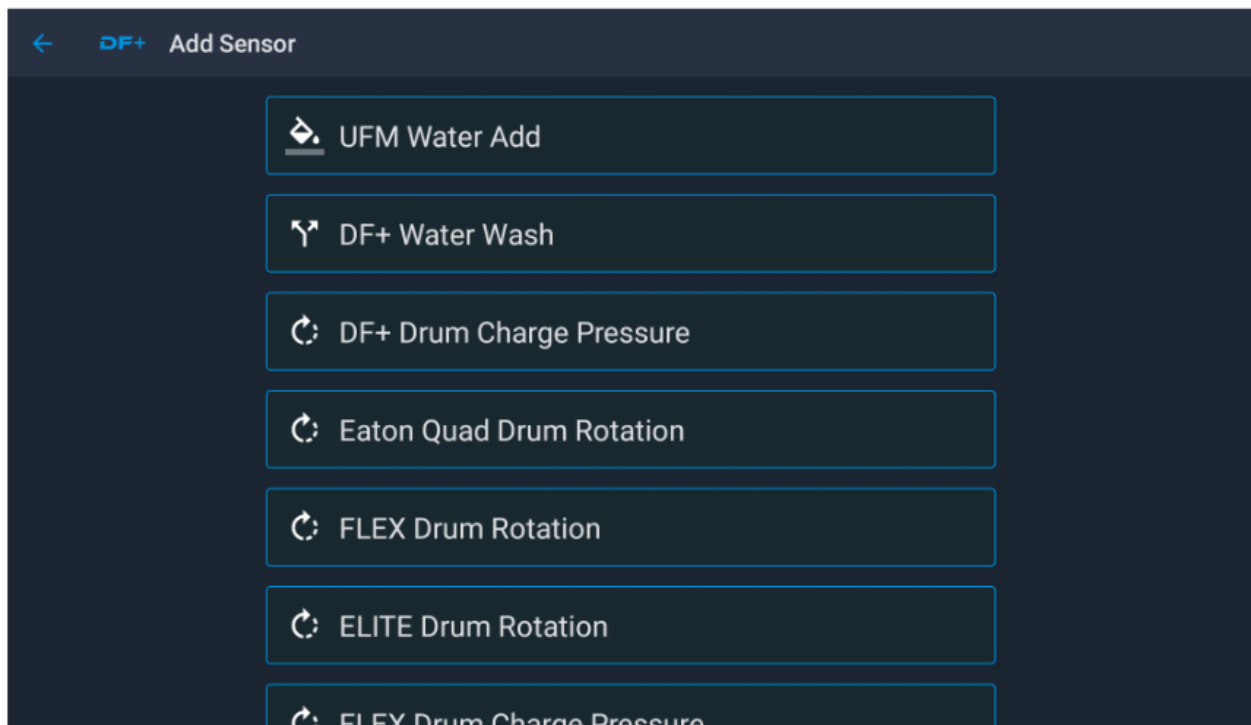

Touch the Trash Can to delete the Sensor. When finished, Touch the “X” in the bottom of the screen.

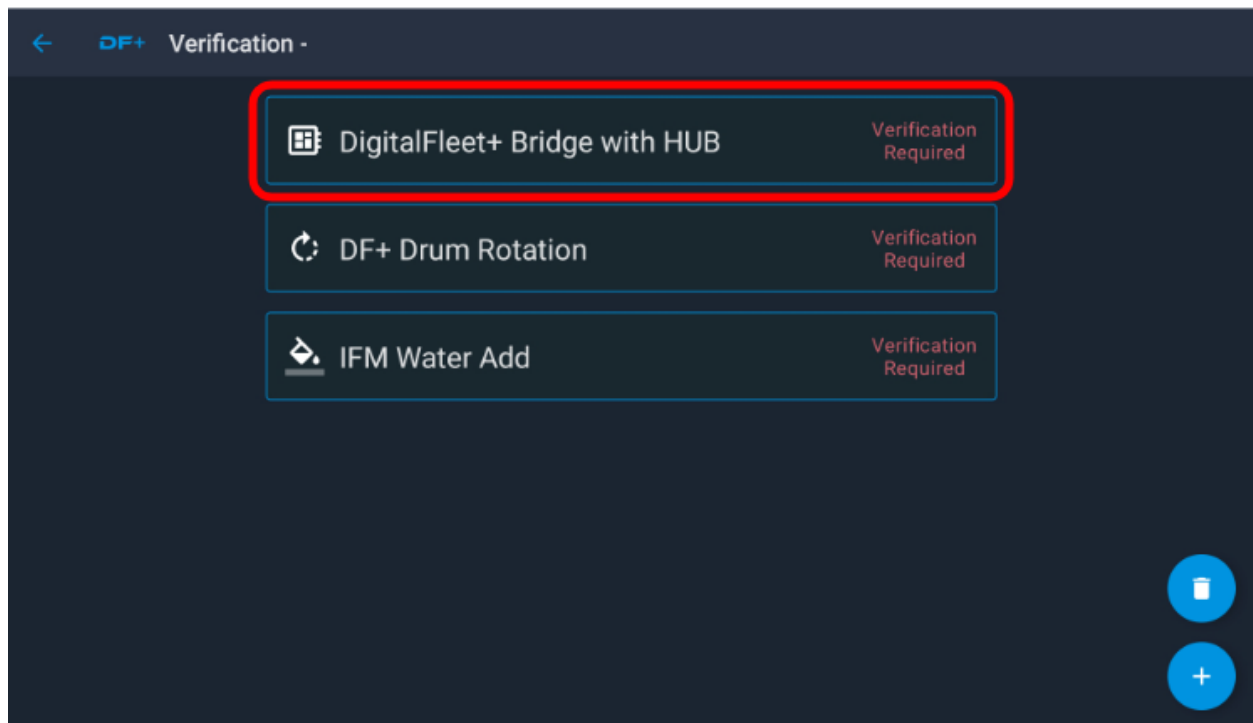

If you do not see a sensor that has been installed on your truck, you may add it. Touch the “+” button.

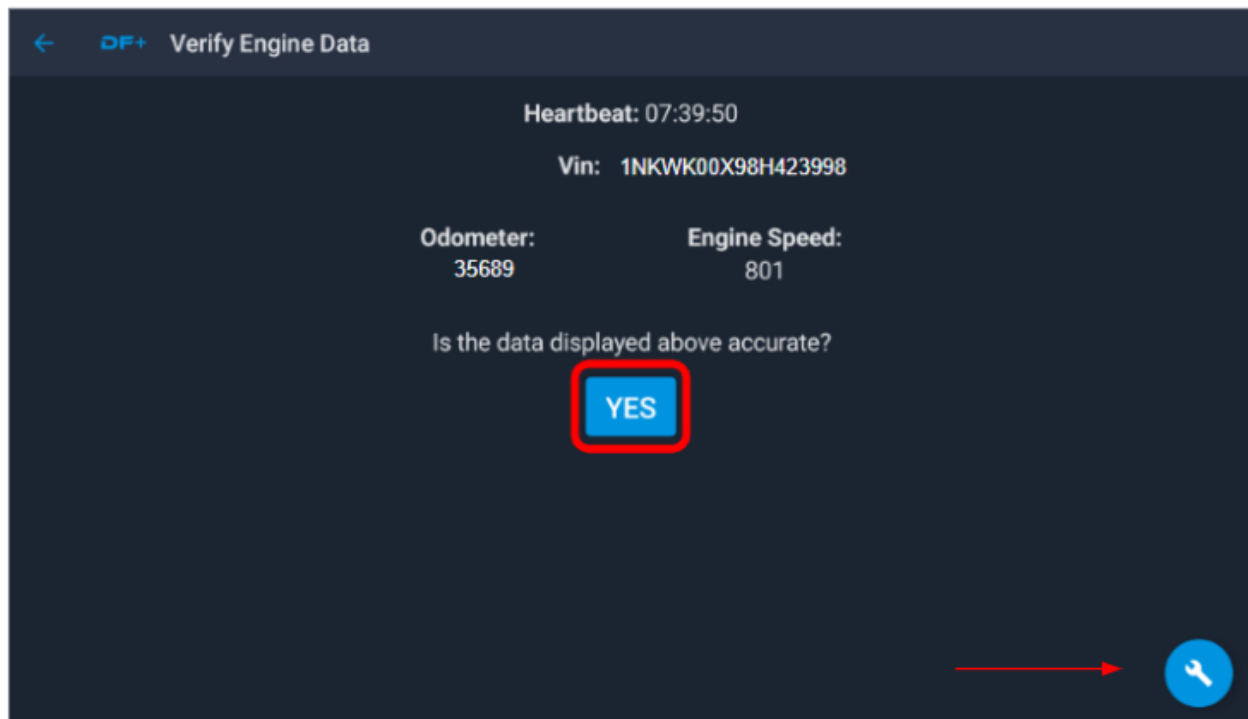

Scroll through the sensor options, if you need to add one, just touch the appropriate sensor. It will be added and you will go back to the previous screen.

Touch DigitalFleet+ Bridge with Hub

If information is accurate to your chassis, press YES. If not, touch the wrench icon, in the lower right corner.

If you select the wrench icon, this screen will appear. You may choose the best option for your truck. Touch the back arrow to go to the previous screen. You need to touch “YES” to continue on to verify Engine Data.

← DF+ Troubleshoot Options

Select the Odometer option that is the closet match to the Truck's dashboard

- ☒ -1.0 Controller (Preferred Source)
- ☐ 123304.27757240999 Engine
- ☐ 0.0 Cluster

Select baud rate

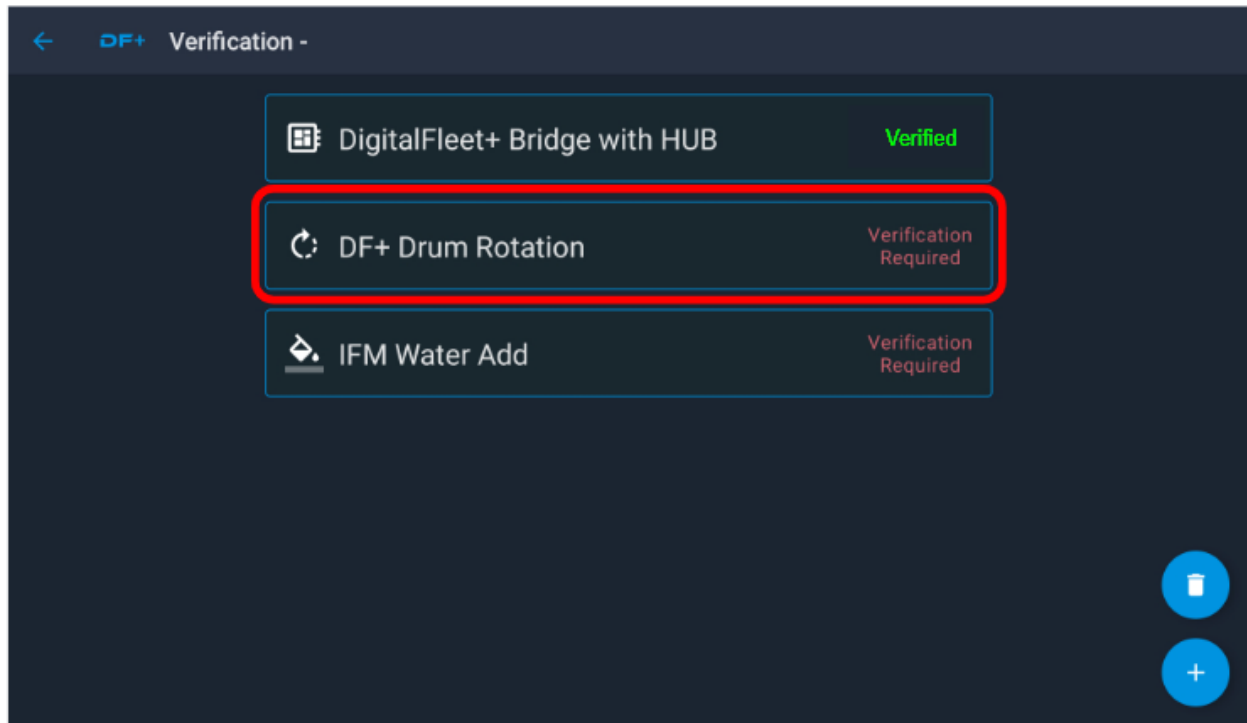

- ☒ 250
- ☐ 500

DigitalFleet+ Bridge with Hub is now Verified.
